TO WHOM IT MAY CONCERN

Dear sir/madam,

Turbo Agencies have had a business relationship with Captels in France for some 5 years.

We have axle weighing systems working in Zambia and DRC Congo with Mopani Copper Mines and Mutanda Mining, as well as a mobile system with Malta Metals in Kitwe, Zambia.

To date the systems have operated without any problem, failure or requirement for replacement parts, and our customers are very satisfied with the accuracy and ease of use.

We have no hesitation in recommending Captels weighing systems to any prospective customer.

Yours faithfully,

A handwritten signature in blue ink, appearing to read 'K. Parry', is written over a horizontal line.
